

0851FJ1-AI BOEING 757 PITOT PROBE

Since 1925, Aero-Instruments has been one of the most trusted names in the design and manufacture of Air Data Sensors. We are leaders in experience, quality, service and innovation, dedicated to the development of technologically-advanced sensors. Now, we're bringing this expertise to the Boeing 757 fleet, with the 0851FJ1-AI Pitot Probe.

Developed by Aero-Instruments, the 0851FJ1-AI Pitot Probe meets or exceeds SAE AS393, AS8006, and BS2G.135 for environmental icing. With extensive testing and analysis refined by years of experience, reliability is built into every facet of our product. The current requirements of TSO-C16 as well as proposed revisions have been addressed through certification testing.

FEATURES

- FAA-PMA Direct Replacement Part
- Exceeds existing icing standards
- Enhancements made for longer life
- Cost competitive
- In-stock for same-day shipment

ELIGIBILITY INFORMATION

Part Name:	Pitot Probe
Part Number:	0851FJ1-AI
Approved Replacement for Part Number:	Goodrich 0851FJ-1 Boeing S232N911-2
<small>(Supersedes all 0851FJ part numbers)</small>	
Make Eligibility:	The Boeing Company
Model Eligibility	757-200, -300

Our legacy of experience is surpassed only by our dedication to the science of engineering. When developing our Air Data Sensors, we focus on maximizing our work in four key areas: **experience, quality, service and innovation.** We're dedicated to researching and implementing enhancements for our current sensors or developing new products. When you work with Aero-Instruments, you receive access to all facets of our customer-focused sales and engineering support.

We understand what you expect from an aerospace supplier. That's why we're dedicated to providing truly superior and unmatched customer service. Contact our knowledgeable sales staff at 866.423.7646 or sales@aero-inst.com to place an order, learn more about Aero-Instruments and our parts, or obtain technical support. We will work with you to prove why we are the best in the business.

experience

quality

service

innovation

experience.

Aero-Instruments has been providing sensors to the aerospace industry for more than 80 years. Our sensors have flown on nearly every type of aircraft including commercial aircraft, military aircraft, business jets and helicopters.

quality.

ISO 9001:2000 With Design/AS9100B: 2004 Certified; FAA/JAA Repair Station.

service.

Our dedicated customer service department ensures in-stock sensors for same day shipment.
24 / 7 / 365 AOG Support: 866.423.7646

innovation.

Comprehensive on-site testing facilities and equipment for product research and development.

Working with Aero-Instruments, you have the reliability and stability of a company invested in the business of aerospace since 1925, and the energy inspired by innovation. To witness the powerful combination of our people and our sensors, contact us today.
